Análisis Comparativo

PANORÁMICA GENERAL

En los meses transcurridos del año 2009, han comenzado a aparecer señales de un menor ritmo de deterioro generalizado de la economía mundial, con una incipiente recuperación en algunas de las economías que suelen venir actuando como locomotoras del crecimiento. Así, parecen comenzar a verse los efectos del importante apoyo, a través de los estímulos tanto fiscales como financieros, de todos los gobiernos y de los distintos bancos centrales. No obstante, para poder asegurar que estos atisbos de mejora se transformen en una garantía de crecimiento sólido en el corto plazo, habrá que esperar a ver si y cómo esta elevada cantidad de liquidez de la que se ha provisto a las entidades financieras se va canalizando de forma eficiente hacia la financiación de las empresas y de las familias, proceso que está, en cierta forma, estancado no sólo por las mayores exigencias de las propias entidades hacia sus potenciales clientes, sino también porque éstos, en un contexto económico como el actual, son más reticentes a demandar crédito, posponiendo sus decisiones inversoras o de consumo

Hay que señalar que los mensajes de la mayor parte de Instituciones en este sentido no han supuesto que los bancos centrales se hayan posicionado en línea de endurecer la política monetaria. Los mensajes han sido retrasar las expectativas de subidas de tipos de interés hasta el próximo año 2010 y que, cuando éstas se lleven a cabo, se harán siempre de una forma muy gradual. Por otra parte, ante estos indicios de disminución de las tensiones financieras y de que la economía mundial parece encaminarse hacia el final de la crisis, hay que señalar también, para completar el diagnóstico, que, desde el pasado mes de marzo, las Bolsas mundiales han experimentado una muy significativa recuperación.

En esta línea, es interesante destacar cómo, en los meses centrales del año, importantes economías, como la alemana, la japonesa y la francesa, han empezado ya a mostrar signos de una incipiente recuperación. Por su parte, las economías emergentes asiáticas (China e India) han presentado un ritmo de crecimiento superior al registrado al inicio del año y en el caso de Estados Unidos, aunque

todavía su economía presenta descensos en su ritmo de crecimiento, éstos son menos importantes que los registrados en los meses inmediatamente anteriores. No obstante, ante esta situación, es importante destacar, por una parte, que quizás no haya llegado todavía el momento de bajar la guardia y retirar de forma prematura los apoyos a las entidades financieras, antes de que la recuperación sea más sólida, pero, sobre todo, que no se debe perder de vista que, dado que la recuperación del mercado laboral tiene un desfase con la de la actividad económica, y puesto que la recuperación del consumo privado debe ser un importante pilar sobre el que pivote la recuperación, ésta va a estar condicionada no sólo por el momento en que repunte el crecimiento del empleo, sino que también va a depender, entre otros elementos, del elevado nivel de endeudamiento de las familias y de las condiciones restrictivas para la obtención de créditos.

Si analizamos la situación por la que atraviesan unas y otras economías, en el caso de la **economía estadounidense**, la OCDE prevé que el PIB descenderá a finales del año 2009 un 2,8% en tasa intertrimestral anualizada. Hay que señalar que el descenso del segundo trimestre fue del 1%, frente al 6,4% del trimestre anterior y que las últimas previsiones de la OCDE indican un crecimiento positivo, en el tercer y cuarto trimestre, del 1,6% y del 2,4%, respectivamente. En lo que respecta al mercado laboral, la recuperación no se prevé hasta mediados del año 2010, pudiendo alcanzar el desempleo al 10% de la población activa. Por último, la inflación, que se sitúa en el momento actual en caídas próximas al 1%, pasará a estar por encima del 1,5% en el próximo año

Por su parte, **en Alemania** el PIB en el segundo trimestre del año descendió en términos interanuales un 5,9%, frente al 6,7% del trimestre anterior. No obstante, hay que señalar que en el segundo trimestre del año creció respecto al trimestre anterior un 0,3%, siendo el primer avance desde comienzos del año 2008. En este caso, la OCDE prevé que en el conjunto del año 2009 el PIB caerá un 4,8%, lo que rebaja su previsión anterior en 1,3 puntos porcentuales. Por lo que respecta al mercado de trabajo, la tasa de paro en el mes de septiembre permanece estabilizada en el 8,3% de la población activa. Hay que señalar que la tasa de paro

media en el año 2008 había sido del 7,8%. Por último, la inflación se situó en agosto en un -0,1%, frenando el descenso del -0,7% del trimestre anterior

Por último, la **economía japonesa** también creció en el segundo trimestre, respecto al trimestre anterior, por vez primera desde comienzos del año 2008 (un 0,9%). No obstante, para esta economía la OCDE pronostica un gradual empeoramiento en la segunda mitad del año que situará el descenso del PIB durante 2009 en un 5,6%, aunque esto supone una rebaja de 1,2 puntos porcentuales respecto a su previsión anterior. Esto se debe, en alguna medida, al mal comportamiento del mercado laboral, ya que la tasa de paro alcanza un máximo histórico del 5,7% en el mes de julio. Por lo que respecta a los precios, la inflación en el mes de julio se situó en el -2,3%, registrando descensos sucesivos cada vez mayores desde el mes de febrero.

En lo que respecta **a las economías emergentes asiáticas**, que, como consecuencia, fundamentalmente, del deterioro de sus exportaciones y las condiciones más restrictivas a la financiación exterior, se han visto también afectadas por la crisis, aunque más tarde y en menor medida que el resto de economías, en los meses transcurridos del año 2009, han notado, también, no sólo el efecto de sus planes de impulsos internos, sino la atenuación de la caída del comercio internacional. Así, El PIB de China creció en el segundo trimestre del 2009 un 7,9% en términos interanuales, mientras que la economía de la India lo hizo en un 6,1%. Hay que indicar que, según las previsiones de los distintos Organismos internacionales, en 2009 en conjunto estas economías crecerán por debajo del año anterior, aunque por encima del 5%, experimentando una importante reactivación en 2010, hasta volver a crecer en términos muy similares a lo que venían haciendo antes de experimentar los efectos de la crisis

Por último, las previsiones de los distintos Organismos son más pesimistas en el caso de la **economía española**, augurando un inicio de la salida de la crisis con un desfase de algunos meses respecto a algunos de los países del entorno. No

obstante, hay que señalar que, mientras que en el segundo trimestre del año 2009¹ los datos de Contabilidad Trimestral, corregidos de efectos estacionales y de calendario, muestran un descenso, respecto al mismo trimestre del año anterior, del 4,2%, frente al 3,2% del trimestre anterior, en la zona euro dicho descenso es superior en medio punto al registrado por la economía española. Además, en términos intertrimestrales, el descenso del 1,1% es medio punto porcentual inferior al registrado en el primer trimestre del año.

Este comportamiento no es homogéneo en todos los sectores económicos. Así, mientras que el sector industrial (si se excluyen las ramas energéticas) atraviesa una fase de significativa desaceleración, que se traduce en que en el segundo trimestre del año 2009 se produzca un descenso del 9,7%, frente al descenso del 7,3% registrado en el primer trimestre y el crecimiento medio del 1,9% del año 2008, el sector servicios experimenta una desaceleración menor, pasando de un descenso del 0,2% en el primer trimestre a un 1,1% en el segundo. Esto es consecuencia de la desaceleración del comportamiento de los servicios de mercado (-2,3%, frente a -1%), porque los servicios de no mercado experimentan una relativa aceleración de su ritmo de crecimiento, pasando de ascenso del 2,6% en el primer trimestre a un 3,2% en el segundo. Por su parte, el sector de construcción parece estabilizarse en descensos del 6% (-5,7% en el trimestre anterior). Por último, el sector agrario y pesquero presenta un descenso del 1% en el segundo trimestre del 2009, frente al 2,3% del trimestre anterior.

Desde la óptica de la demanda interna, en el segundo trimestre del año 2009 ésta detrae 7,3 puntos porcentuales al crecimiento agregado, 1,2 puntos porcentuales más que en el trimestre anterior. Así, en dicho trimestre el descenso del consumo final de los hogares fue del 5,9%, ocho décimas más que el registrado en el primer trimestre del año. Por su parte, la inversión en el segundo trimestre del 2009 presenta un descenso interanual del 17% en la FBKF, frente al descenso del 15,2% registrado en el trimestre anterior. No obstante, es conveniente resaltar que es la FBKF en bienes de equipo la que cae de forma muy significativa (un 28,9% en

¹ Último dato disponible al realizar este análisis

el segundo trimestre del año 2009, frente al 24,2% correspondiente al primer trimestre), mientras que la FBKF en construcción cae en el segundo trimestre un 12%, cuando lo hacía en un 11,5% en el primer trimestre del año. Por su parte, hay que señalar que la aportación de la demanda externa, que se sitúa en 3,1 puntos porcentuales (2,9% en el primer trimestre), no consigue compensar el mal comportamiento de la demanda interna.

Por lo que respecta al mercado de trabajo, en el año 2009 éste presenta una evolución más desfavorable que en el año anterior. Así, según las estimaciones de la Encuesta de Población Activa correspondientes al segundo trimestre del año 2009, la población ocupada experimentó un descenso del 7,3%, frente al 6,4% del trimestre anterior. Esto supone que, en media, el descenso en los seis primeros meses del año fue del 6,8%, cuando en el conjunto del año anterior había sido del 0,5%.

En el segundo trimestre del año 2009 la población ocupada descendió, en términos interanuales, en todos los sectores. Así, el descenso fue del 4,2% en el sector agrario y del 2,7% en el de servicios, siendo los máximos descensos los registrados en el sector industrial (-13,7%) y la construcción (-24,6%). Hay que señalar que, mientras que en el sector agrario, la industria y los servicios dicho descenso fue superior al registrado en el trimestre anterior (-3%, -12,5% y -1,3%, respectivamente), en la construcción se reduce el descenso en 1,3 puntos porcentuales.

Esta evolución del mercado de trabajo se ve corroborada por la evolución que se desprende del análisis de la afiliación a la Seguridad Social. Así, en los ocho primeros meses del año 2009 se registra un descenso en términos interanuales del número de afiliados del 6,3%, cuando el descenso medio del año 2008 fue del 0,8%. En este caso, el sector agrario y de servicios en el período enero-agosto registran un descenso medio en términos interanuales del 0,9% y del 4,2%, siendo dicho descenso en el sector industrial y la construcción del 9,4% y del 20,3%, respectivamente.

Asimismo, la tasa de paro en el segundo trimestre del año 2009 es superior en cinco décimas a la registrada en el trimestre anterior, situándose en el 17,9% de la población activa, mientras que el paro registrado aumenta en los ocho primeros meses del año 2009 en unas 500.000 personas con relación al existente a finales del año 2008. Por ello, en términos interanuales, en los ocho meses primeros del año 2009 el incremento fue del 50,2%, cuando el incremento medio en el año 2008 había sido del 24,6%. Este aumento se manifestó en todos los sectores incluyendo el colectivo de personas sin empleo.

Por lo que respecta a la inflación durante el año 2009, ésta presenta una significativa desaceleración con relación al año anterior, registrando sucesivos descensos desde el mes de marzo. De esta forma, la inflación en el mes de agosto del año 2009 se situó en el -0,8%, frente al 1,4% registrada en el mes de diciembre del año 2008. La citada evolución se debe a que, mientras los precios de la alimentación pasan de un 2,6% en diciembre a un -0,2% en el mes de agosto del año actual, los precios de los productos no alimenticios crecen en términos interanuales un 1,1% en diciembre de 2008 y caen un 1% en agosto del 2009. Hay que señalar, además, que los precios de los bienes industriales caen en agosto un 3,8%, frente al -1,5% registrado en diciembre del año anterior. Por su parte, los precios de los servicios se han situado en agosto en el 1,9% frente al 3,7% del mes de diciembre del año anterior.

La citada evolución de los precios ha supuesto que la inflación subyacente fuese en agosto del 2009 del 0,4%, dos puntos porcentuales inferior a la registrada en el mes de diciembre del año anterior. Por otra parte, la evolución de la inflación en España y en los distintos países de la UE situó el diferencial con la zona euro en el mes de agosto en el -0,6% y en un -1,4% respecto a la UE-27.

Por último, durante el año 2009 los salarios han experimentado un proceso de cierta desaceleración. En efecto, los salarios han crecido a un ritmo ligeramente inferior al registrado en el año anterior. Así, el incremento salarial pactado en los convenios realizados en los ocho primeros meses del año 2009 fue del 2,7%, lo que supone ocho décimas menos que el correspondiente al año 2008, aunque este

diferencial es de nueve décimas, si en éste último se incluyen los convenios firmados después de diciembre y la cláusula de salvaguarda.

ANÁLISIS DE LAS DIFERENTES CC.AA.

1.- ACTIVIDAD PRODUCTIVA

1.1.- Sector industrial

Desde la óptica de la actividad productiva, para analizar la evolución del **sector industrial**, si se tiene en cuenta la información facilitada por el IPI elaborado por el INE, se observa que en los siete primeros meses del año 2009, éste experimentó un descenso en todas las Comunidades Autónomas siendo en **Andalucía** (-15,5%), **Asturias** (-16,2%), **Canarias** (-12,1%), **Cantabria** (-19,6%), **Castilla y León** (-18,2%), **Castilla la Mancha** (-14,2%), **Extremadura** (-13,6%), **Madrid** (-15,9%), **Murcia** (-19,7%) y **La Rioja** (-16,6%) dicho descenso inferior al medio nacional (-20,7%). En **Galicia**, el descenso es similar al medio y en todas las demás Comunidades se registra un descenso superior al medio nacional. Hay que señalar que en todas las Comunidades la producción industrial ha tenido un comportamiento peor que el correspondiente al año anterior y que esto se refleja también en la evolución que presentan otros indicadores cuantitativos y las opiniones de los empresarios a través de la encuesta de coyuntura industrial.

Si se analiza la evolución del mercado laboral en este sector se observa que, durante el segundo trimestre del año 2009, el empleo en el sector industrial, según los datos estimados por la Encuesta de Población Activa registró un descenso medio nacional en términos interanuales del 13,7%. Además, hay que señalar que sólo en Navarra la población ocupada en este sector crece (4,3%), siendo en las Comunidades de **Andalucía** (-13,2%), **Asturias** (-13,1%), **Baleares** (-9,3%), **Canarias** (-11,5%), **Castilla y León** (-6,3%), **Castilla la Mancha** (-9%), **Extremadura** (-11,7%), **Galicia** (-10,8%),

País Vasco (-8,3%) y **La Rioja** (-4,8%), donde se experimenta un descenso del empleo inferior al medio nacional. En el resto de Comunidades, se el empleo descendió más que la media, registrándose el mayor descenso en **Murcia** (-20,3%).

No obstante, la evolución comparada que muestra el crecimiento de los afiliados a la Seguridad Social en este sector es diferente. Así, según dicho indicador, en los ocho primeros meses del año 2009 el número de afiliados a la Seguridad Social en el sector industrial desciende en términos interanuales en todas las Comunidades, siendo en las de **Andalucía** (-7,7%), **Asturias** (-6,4%), **Baleares** (-2,7%), **Canarias** (-3,9%), **Cantabria** (-4,3%), **Castilla y León** (-6,7%), **Extremadura** (-4,1%), **Galicia** (-8,3%), **Madrid** (-9,2%), **Navarra** (-8,1%), **País Vasco** (-8%) y **La Rioja** (-6,7%), donde el descenso es inferior al nacional (-9,4%), cayendo en todas las demás por encima de dicha media.

1.2.- Construcción

En lo relativo a la **construcción**², durante los meses transcurridos del año 2009 la actividad de este sector en un buen número de Comunidades ha ralentizado la fase de desaceleración del ritmo de crecimiento de su actividad, por la que venía atravesando en los meses anteriores. Así, por lo que respecta al subsector residencial, con la poca información actualizada disponible, podemos decir que en los seis primeros meses del año 2009 el número de viviendas iniciadas creció en términos interanuales sólo en el **País Vasco** (2,7%), siendo el descenso inferior a la media nacional un 52,4% en las Comunidades de **Andalucía** (-44,4%), **Asturias** (-25,4%), **Canarias** (-51,7%), **Cantabria** (-51,2%), **Extremadura** (-46,4%), **Madrid** (-5,8%) y **Navarra** (-42,4%), siendo el descenso superior al medio en todas las demás, registrándose el mayor descenso en **La Rioja** (-78,1%).

Por lo que respecta al número de visados de obra nueva por el Colegio de Arquitectos Técnicos, que adelantan la evolución de este subsector, hay que destacar que en los siete primeros meses de 2009 en las Comunidades de **Aragón** (-50%), **Asturias** (-44,1%), **Cantabria** (-59,9%), **Castilla y León** (-60,3%), **Extremadura** (-49,2%), **Madrid** (-38,5%), **Navarra** (-58,8%) y **País Vasco** (-17,7%), se registra un descenso inferior al medio nacional (-62%), situándose las demás Comunidades con un descenso superior. Hay que señalar que los descensos máximos se registran en las Comunidades de **Canarias** (-80,5%) y **La Rioja** (-84,4%).

En lo que respecta a la obra pública, los datos facilitados por SEOPAN correspondientes a los ocho primeros meses del año 2009 señalan un crecimiento medio nacional en términos interanuales prácticamente nulo. Por Comunidades, se registra un incremento en las de **Andalucía** (7,2%), **Aragón** (7,9%), **Baleares** (94,9%), **Castilla y León** (25,5%), **Extremadura** (44,6%), **Madrid** (58,5%), **Murcia** (35%), **Navarra** (46,6%) y **La Rioja** (43,7%), registrándose en todas las demás un descenso de la licitación. siendo el descenso máximo el registrado en **Castilla la Mancha** (-33,8%). No obstante, los datos acerca de la obra pública facilitados por el Ministerio de FOMENTO muestran que ésta descendió en el período enero-julio del 2009 en media nacional un 5%, siendo en las Comunidades de **Baleares** (152,9), **Castilla y León** (8,4%), **Castilla la Mancha** (6,9%), **Madrid** (40,4%), **Murcia** (42,7%), **Navarra** (61,5%), **País Vasco** (28,5%) y **La Rioja** (86,3%) donde se registra un incremento de la licitación pública. Hay que resaltar que en Asturias (-%) el descenso es inferior al medio nacional y que el mayor descenso es el registrado en **Galicia** (-28,3%).

Por lo que respecta a la evolución del mercado de trabajo en este sector hay que destacar que durante el segundo trimestre del año 2009 se produjo un descenso de la población ocupada en la construcción en todas las

² Hay que señalar que, por diferentes motivos, las distintas fuentes que suministran información acerca de este sector, siguen ralentizado el suministro de información. Esto supone que, a la hora de elaborar el análisis, la

Comunidades Autónomas, registrándose un descenso inferior al nacional (-24,6%) en las Comunidades de **Aragón** (-17,7%), **Baleares** (-21,5%), **Cantabria** (-22,2%), **Castilla y León** (-13%), **Cataluña** (-17,4%), **Galicia** (-18,4%), **Madrid** (-16,2%), **País Vasco** (-13,6%) y **La Rioja** (-13,4%), situándose el descenso en todas las demás por encima de la media. El mayor descenso se registra en **Canarias** (-37,5%) y **Murcia** (-37,5%).

Por otra parte, en lo que respecta al número de afiliados a la Seguridad Social en este sector en los ocho primeros meses del año 2009 éste experimenta un descenso en todas las Comunidades siendo el descenso inferior al medio nacional, (-20,3%), en las Comunidades de **Asturias** (-12,6%), **Baleares** (-18,7%), **Cantabria** (-18,5%), **Castilla y León** (-17%), **Cataluña** (-16%), **Extremadura** (-18,7%), **Galicia** (-10%), **Madrid** (-17%), **Navarra** (-15,8%) y **País Vasco** (-7,9%). En todas la demás Comunidades el descenso es superior, siendo el máximo descenso el registrado en **Canarias** (-30,1%).

1.3.- Servicios

Durante los meses transcurridos del año 2009 el **sector servicios** presentó en la mayor parte de las Comunidades Autónomas una situación muy similar a la correspondiente al año anterior en la mayor parte de sus subsectores. Así, los datos correspondientes al período enero-agosto de 2009 muestran que la tasa de crecimiento interanual del número de pernoctaciones en establecimientos hoteleros fue positiva sólo en **Cantabria** (2,3%). Asimismo, el descenso fue inferior al medio nacional (-7,5%) en las Comunidades de **Cataluña** (-4,4%), **Comunidad Valenciana** (-4,3%), **Extremadura** (-4,4%), **Galicia** (-6,2%), **Navarra** (-5,9%), **País Vasco** (-1,9%) y **La Rioja** (-6,3%), registrándose un descenso similar al medio en **Baleares**, **Castilla y León** y **Madrid**, cayendo por encima en todas las demás. El descenso máximo del 24,6% fue el registrado en **Aragón**.

En lo referente al subsector de Transporte y Comunicaciones, durante los siete meses primeros del año 2009 los datos del transporte aéreo han venido mostrando en muchas Comunidades un comportamiento ligeramente peor de dicho subsector. Así, el número de pasajeros transportados en avión durante dicho período presentó un descenso en términos interanuales en todas las Comunidades Autónomas, excepto en las de **Cantabria** (13,3%) y **Castilla la Mancha** (118,7%), siendo el descenso inferior al medio nacional (-11,5%) en **Aragón** (-9,8%), **Baleares** (-6,7%), **Extremadura** (-3,8%), **Galicia** (-10,8%) y **Madrid** (-9,6%), registrándose un descenso similar en **Cataluña** y cayendo por encima en las demás. Los mayores descensos se registraron en **Navarra** (-28,4%) y **La Rioja** (-29%).

Para completar el análisis de la evolución del sector terciario se analiza la evolución del empleo en el sector servicios. En este sentido, según los datos de la Encuesta de Población Activa, durante el segundo trimestre del año 2009 el empleo en el sector terciario descendió en términos interanuales en todas las Comunidades Autónomas, excepto en **Cantabria** (2,8%). Además, el descenso fue inferior al medio nacional (-2,7%), en las Comunidades de **Andalucía** (-1,2%), **Aragón** (-0,4%), **Asturias** (-1,8%), **Castilla y León** (-0,9%), **Extremadura** (-1,9%), **Galicia** (-0,7%), **Madrid** (-0,8%) y **Murcia** (-1,8%), cayendo en **Castilla la Mancha** de forma similar a la media y en todas las demás por encima, siendo el descenso máximo el registrado en **Cataluña** (-6,4%).

Por lo que respecta a la evolución de los afiliados a la Seguridad Social en el sector servicios durante los ocho primeros meses del año 2009, en **Asturias, Cantabria, Castilla y León, Castilla la Mancha, Extremadura, Galicia, Madrid, Navarra, País Vasco y La Rioja** el descenso fue inferior al medio nacional (-4,2%) y en todas las demás por encima. Los descensos oscilan entre el mínimo registrado en **Extremadura** (-1,6%) y el máximo de **Comunidad Valenciana** (-7,4%).

2. - DEMANDA

En lo que respecta a la **demand**a interna, durante los meses transcurridos del año 2009 el consumo privado ha venido presentando en un buen número de Comunidades Autónomas crecimientos más reducidos que en el año anterior. Por su parte, la inversión muestra también un crecimiento inferior al registrado en el año anterior debido, no sólo a la inversión en construcción, sino también por la desaceleración que se constata en la inversión en bienes de equipo.

Por lo que se refiere a la **inversión**, hay que señalar que el índice de producción industrial de bienes de equipo en el período enero-julio del año 2009 cae en todas las Comunidades, registrándose en **Andalucía** (-17,6%), **Asturias** (-5,2%), **Canarias** (-17,5%), **Cantabria** (-25,3%), **Castilla y León** (-22,5%), **Castilla la Mancha** (-4,9%), **Extremadura** (-25%), **Madrid** (-19,2%), **País Vasco** (-24,7%) y **La Rioja** (-8,7%) un descenso inferior al medio nacional (-28,1%), mientras que en el resto de Comunidades el descenso es superior, debiendo de destacar que en **Navarra** el descenso es el máximo situándose en el 37,3%.

Por lo que respecta a los bienes intermedios, hay que señalar que en el período enero-julio del 2009 la producción industrial de este tipo de bienes descendió en términos interanuales en todas las Comunidades Autónomas, siendo el descenso inferior al medio nacional (-27,3%) en **Andalucía** (-19,5%), **Cantabria** (-24,3%), **Cataluña** (-26,5%), **Comunidad Valenciana** (-26,1%), **Galicia** (-20,7%), **Madrid** (-24,8%), **Murcia** (-24,7%) y **La Rioja** (-26,4%). Asimismo, hay que destacar que el máximo descenso se registra en **Canarias** (-37%) y **Baleares** (-41,8%).

Asimismo, durante los meses transcurridos del año 2009 en algunas Comunidades Autónomas otros indicadores indirectos, como la matriculación de vehículos de carga o la inscripción de maquinaria agrícola, confirman la fase de decrecimiento por la que viene atravesando la inversión.

Por su parte, durante los siete primeros meses del año 2009 **el consumo** en la mayor parte de Comunidades Autónomas muestra signos de una significativa desaceleración, sólo en **Canarias** (1,8%) se registra un incremento en el índice de producción industrial de bienes de consumo. Por otra parte, la producción de este tipo de bienes cae por debajo de la media nacional (-11,7%) en **Asturias** (-1,8%), **Cantabria** (-11,1%), **Castilla y León** (-4,3%), **Cataluña** (-10,9%), **Madrid** (-6,4%), **Navarra** (-11,1%) y **La Rioja** (-11%), experimentado un descenso superior en las demás Comunidades, debiendo de destacar que los descensos más significativos se registran en **Comunidad Valenciana** (-19,8%) y **País Vasco** (-20,8%).

Por otra parte, durante los ocho primeros meses del año 2009 la matriculación de automóviles registró un descenso en términos interanuales en todas las Comunidades, excepto en **Navarra** (3%), que en **Asturias, Cantabria, Castilla y León, Castilla la Mancha, Cataluña, Extremadura, Galicia, País Vasco y La Rioja** fue inferior al medio nacional (-32,2%). Hay que destacar que el descenso más significativo se registró en la **Comunidad Valenciana** (-44%).

Por su parte, el consumo de gasolina, que en el ámbito nacional experimentó durante los siete primeros meses del año 2009 un descenso del 4,1%, presentó un descenso en términos interanuales en todas las Comunidades Autónomas, excepto en **Cantabria** (3,7%) y **País Vasco** (1,9%), siendo la caída inferior a la media en las Comunidades de **Asturias, Baleares, Canarias, Castilla y León, Castilla la Mancha, Extremadura, Galicia, Madrid y La Rioja** y superior a dicha media en el resto de Comunidades, debiendo resaltar el descenso del 6,7%, registrado en **Andalucía**.

Durante los seis primeros meses del año 2009 la **demand externa** presentó una evolución muy similar en las distintas Comunidades. Así, en todas las Comunidades se registró una evolución desfavorable tanto de las exportaciones como de las importaciones —hay que recordar que sólo se dispone de estos datos en euros corrientes—en todas las Comunidades se registran descensos en ambas magnitudes, con la única excepción de las exportaciones de **Baleares** y

Extremadura que crecen en dicho período un 19,9% y 0,9%. En todo caso, ello siempre ha supuesto una desaceleración, con la excepción de **Baleares**, puesto que en este caso las exportaciones habían caído en la media del año 2008 un 1%, mientras que en **Extremadura**, éstas habían crecido un 17,5%. En todos los demás casos se registra un descenso en ambas magnitudes, que o bien es superior al que se venía registrando en el año anterior, o lo que sucede es que desciende la magnitud correspondiente en el año 2009, cuando todavía crecía, y en algunos casos en términos muy elevados, en el año anterior.

Si se analiza el comportamiento de las importaciones, en el período enero-junio del año 2009, tal y como ya se ha dicho, éstas descendieron en términos interanuales en todas las Comunidades Autónomas, siendo el descenso inferior al medio nacional (-32%) en **Castilla y León, Cataluña, Extremadura, Galicia, Madrid y La Rioja** mientras que en las demás Comunidades se registra una caída superior a la media.

Asimismo, si se examinan las importaciones de los distintos tipos de bienes la situación presenta algunos rasgos diferenciados. Así, por lo que respecta a las importaciones de bienes de consumo, durante los seis primeros meses del año 2009, mientras que en **Extremadura, Galicia y Madrid** se produjo un incremento de las importaciones con relación al mismo período del año anterior, en todas las demás Comunidades se registraron tasas de crecimiento negativas, que sólo en el caso del **País Vasco** fue inferior a la nacional (-10%), situándose **Cataluña y La Rioja** en dicha media y todas las demás por encima.

Por lo que respecta a los bienes de capital, en el citado período de tiempo se produjo un descenso de las importaciones en todas las Comunidades, que sólo en **Andalucía, Aragón, Cataluña, Galicia y País Vasco** fue inferior al medio nacional (-34,9%), siendo en **Aragón, Madrid y Murcia** en dicha media y todas las demás por encima, siendo los máximos descensos los que se registran en **Castilla la Mancha** (-62,7%), **La Rioja** (-63,9%) y **Cantabria** (-78,3%). Por último, en lo que respecta a los bienes intermedios en todas las Comunidades las importaciones

disminuyeron con relación al año anterior, siendo en **Baleares, Castilla y León, Castilla la Mancha, Cataluña, Comunidad Valenciana, Galicia, Madrid, Navarra y La Rioja** donde este tipo de importaciones crecieron por debajo de la media nacional (-39,4%) haciéndolo por encima en el resto.

Por lo que respecta a las exportaciones, como ya se ha dicho, las Comunidades en las que éstas presentaron en el período enero-junio del 2009 un incremento en términos interanuales fueron las de **Baleares y Galicia**. Todas las demás Comunidades presentaron un descenso de las exportaciones que en **Andalucía, Castilla y León, Castilla la Mancha, Galicia, Madrid, Murcia y La Rioja** fue inferior a la media nacional (-20,8%), situándose **Navarra** en dicha media y todas las demás por encima.

No obstante, al igual que sucede con las importaciones, el comportamiento según el tipo de bienes es diferenciado. En efecto, mientras que durante los seis primeros meses del 2009 las exportaciones de bienes de consumo crecieron, en términos interanuales, en **Castilla y León, Extremadura, Madrid, Murcia y La Rioja**, cayendo por debajo de la media nacional (-10,5%) en las Comunidades de **Andalucía, Baleares y Galicia**, situándose todas las demás con descensos superiores al medio. En lo que se refiere a las exportaciones de bienes de capital se produjo un incremento en términos interanuales en **Asturias, Baleares, Castilla la Mancha y Navarra**, presentando un descenso inferior al medio nacional (-25,5%) en las Comunidades de **Andalucía, Aragón, Comunidad Valenciana, Extremadura, País Vasco y La Rioja**.

Por último, en cuanto a los bienes intermedios, las exportaciones presentaron un incremento con relación al mismo período del año anterior en **Baleares**. Asimismo, hay que señalar que el descenso fue inferior a la media nacional (-27,1%) en las Comunidades de **Cantabria, Castilla la Mancha, Cataluña, Extremadura, Madrid, Murcia y La Rioja**, situándose en **Aragón** en dicha media y en todas las demás por encima.

3.- MERCADO DE TRABAJO

En lo que respecta al **mercado de trabajo**, durante el segundo trimestre del año 2009 todas las Comunidades, según los datos facilitados por la EPA, presentaron un descenso en el nivel de la ocupación total, que sólo en **Aragón** (-6,9%), **Cantabria** (-4,2%), **Castilla y León** (-4,3%), **Extremadura** (-6,5%), **Galicia** (-4,5%), **Madrid** (-3,9%), **Navarra** (-5,8%), **País Vasco** (-6,9%) y **La Rioja** (-5,1%) fue inferior al descenso medio nacional (-7,3%). En todas las demás Comunidades el descenso fue superior, debiendo señalar que el valor máximo en cuanto a descenso se refiere se registró en **Cataluña**, donde el empleo descendió un 10,1% y en **Canarias** donde lo hace en un 9,6%.

Esta evolución comparada es, en algunos casos, diferente si se analiza la serie de afiliados a la Seguridad Social. En efecto, en este caso, en los ocho primeros meses del año 2009, aunque también se registra un descenso de la afiliación en todas las Comunidades Autónomas, éste fue inferior al medio nacional (-6,3%) en **Andalucía** (-6%), **Asturias** (-4,4%), **Cantabria** (-4,9%), **Castilla y León** (-4,5%), **Extremadura** (-3,4%), **Galicia** (-4,3%), **Madrid** (-5,2%), **Navarra** (-5,7%), **País Vasco** (-3,5%) y **La Rioja** (-5,8%), situándose el resto por encima dicha media. En este caso, los máximos descensos se registran en **Canarias** (-9,4%) y la **Comunidad Valenciana** (-10,3%)

La evolución sectorial del empleo ya se ha analizado en el correspondiente epígrafe detectándose en las distintas CC.AA. rasgos diferenciados. Para completar el análisis se aborda ahora el análisis de la evolución del empleo agrario. En este sentido, se puede observar como, según la EPA, durante el segundo trimestre del año 2009 en **Cataluña**, **Comunidad Valenciana**, **Galicia** y **Murcia** se produjo un incremento en términos interanuales del empleo, registrándose en **Baleares** un crecimiento prácticamente nulo. En las demás Comunidades el empleo en este sector descendió con relación al mismo trimestre del año anterior, siendo este descenso inferior al medio nacional (-4,2%) en **Cantabria**, **Castilla la Mancha** y **Extremadura**, situándose en todas las demás por encima.

Por lo que respecta al número de afiliados a la Seguridad Social, en los ocho primeros meses del año 2009 se registró un incremento del número de afiliados en este sector en **Andalucía, Castilla la Mancha, Comunidad Valenciana, Extremadura y Murcia**, siendo el descenso superior al medio nacional (-0,9%) en todas las demás Comunidades.

Por su parte, en el segundo trimestre del año 2009 la tasa de paro en España ha aumentado en cinco décimas respecto a la registrada en el trimestre anterior, para situarse en el 17,9% de la población activa. Este incremento tuvo lugar en todas las Comunidades excepto en las de **Baleares**, donde pasa del 19,8% en el primer trimestre a un 18,2% en el segundo, **Canarias** donde pasa de un 26,1% a un 25,7%, **Cantabria** donde en el primer trimestre la tasa de paro fue del 12,4% y del 11,7% en el segundo, **Cataluña** con un 16,2% y un 15,9%, respectivamente y **Extremadura** que pasa de un 21,8% a un 20,1%. Asimismo, en **Aragón** la tasa de paro permanece estabilizada en un 13%.

Los incrementos más significativos tuvieron lugar en **Asturias** (14%) y la **Comunidad Valenciana** (21,2%) con 2 puntos porcentuales, **Navarra** (12,2%) con un aumento de 1,8 puntos porcentuales, **Andalucía** (25,4%) con un 1,4% y **La Rioja** (12,7%) con un 1,3. En **Galicia** (13%) y **Murcia** (20,2%) la tasa de paro aumentó en ocho décimas, en **Castilla la Mancha** (19,5%) en siete décimas, en **Castilla y León** (14,1%) el incremento fue de tres décimas, mientras que en **País Vasco** (10,5%) fue de dos décimas y en **Madrid** (13,6%) el incremento fue de una décima.

A pesar de ello, las tasas de paro de las distintas Comunidades Autónomas siguen siendo bastante dispares y parece que todavía no se han acortado de una forma verdaderamente significativa las diferencias. Así, **Canarias y Andalucía** con tasas superiores al 25% son las Comunidades que en el segundo trimestre del año 2009 presentan las tasas de paro más elevadas, mientras que **La Rioja, Navarra, Cantabria y País Vasco** son las cuatro Comunidades que mantienen su tasa de paro por debajo del 13% en dicho trimestre.

Por último, los datos del número de parados registrados en las oficinas del INEM correspondientes a los ocho primeros meses del año 2009 ponen de manifiesto que en todas las Comunidades se produjo un incremento en términos interanuales del número de parados. Además, cuando en el ámbito nacional se produjo un incremento del 50,2%, en **Andalucía** (40%), **Asturias** (39,9%), **Canarias** (44,5%), **Castilla y León** (41,4%), **Extremadura** (30,9%), **Galicia** (29,6%) y **País Vasco** (45%) el incremento del paro fue inferior a dicha media, creciendo el paro registrado en todas las demás Comunidades por encima.

Asimismo, el comportamiento del paro sectorial en las diferentes Comunidades durante los ocho primeros meses del año 2009 presentó algunas diferencias³. En efecto, el paro en el sector agrario creció en términos interanuales en todas las Comunidades Autónomas, excepto en **Canarias** (-4,8%), siendo en **Andalucía**, **Asturias**, **Galicia** y **Madrid** donde dicho incremento fue inferior al medio nacional (23,9%), situándose todas las demás con un crecimiento superior al medio.

Por otra parte, durante los primeros ocho meses del año 2009 el número de parados inscritos en las oficinas del INEM en el sector industrial aumentó en todas las Comunidades. En este caso fue en las Comunidades de **Andalucía** (44,1%), **Asturias** (55,8%), **Castilla y León** (44,7%), **Cataluña** (49,7%), **Extremadura** (44,8%) y **Galicia** (34,8%), donde el crecimiento fue inferior al correspondiente nacional, (59,1%), siendo similar en **Canarias**. En todas las demás Comunidades, el paro registrado aumentó por encima de la media nacional.

Asimismo, el paro registrado en el sector de la construcción aumentó durante los ocho primeros meses del año 2009 en todas las Comunidades Autónomas, siendo en las de **Andalucía** (88,1%), **Asturias** (96,3%), **Baleares** (94%), **Canarias** (82,1%), **Castilla y León** (93,9%), **Castilla la Mancha** (81,5%), **Extremadura**

³ Hay que hacer notar que, dado que la fuente ha comenzado a facilitar los datos desde marzo del 2009 en términos de la nueva CNAE 2009, los crecimientos interanuales en los distintos sectores han de tomarse con cautela. No obstante, en términos de comparaciones interregionales pueden resultar de interés al venir todos afectados por el mismo cambio de la CNAE.

(67,7%), **Galicia** (69,5%) y **País Vasco** (80,2%) donde el paro registrado creció por debajo de la media nacional (97,3%).

Por otra parte, en el período enero-agosto del año 2009 el paro en el sector servicios se incrementó también con relación al año anterior en todas las Comunidades, siendo en las de **Andalucía** (39,7%), **Asturias** (32,1%), **Canarias** (43%), **Castilla y León** (38,3%), **Extremadura** (27,2%), **Galicia** (30,6%) y **País Vasco** (35,3%), donde el paro registrado en este sector aumentó por debajo de la media nacional (44,8%)..

Por último, hay que señalar que durante los meses de enero a agosto del año 2009 se produjo un descenso en el número de parados inscritos en las oficinas del INEM en el colectivo de personas sin un empleo anterior en las Comunidades Autónomas de **Andalucía** (-0,8%) y **Galicia** (-8,4%). Siendo el incremento del paro inferior al medio nacional (9,5%) en las Comunidades de **Canarias** (5,7%), **Castilla y León** (4,8%) y **Extremadura** (4,4%), creciendo en todas las demás por encima.

4.- PRECIOS Y SALARIOS

En lo que respecta a la evolución de los precios, durante los ocho primeros meses del año 2009 en la mayor parte de las Comunidades Autónomas los precios de consumo han caído respecto al mismo período del año anterior la inflación ha sido negativas. Así, en el mes de agosto la inflación se ha mantenido entre la caída menor correspondiente a **Baleares** (-0,7%) y el máximo descenso registrado en **Canarias** (-2%), siendo las Comunidades de **Baleares** (-0,7%), **Cataluña** (-0,3%), **Comunidad Valenciana** (-0,7%), **Madrid** (-0,5%) y **País Vasco** (-0,1%) las que presentaron un descenso de los precios de consumo inferior al nacional (-0,8%), situándose **Cantabria** en dicha media.

En todas las Comunidades en las que en agosto del año 2009 se registró un descenso de los precios de consumo inferior a la media nacional se ha producido un descenso del precio de los bienes de consumo, cuando éstos crecían todavía de

forma significativa a finales del año 2008. Así, hay que resaltar que en las Comunidades incluidas en este grupo la inflación era del 1,3% en diciembre del 2008 en **Baleares**, del 1,6% en **Cataluña y Madrid**, del 1,5% en **Comunidad Valenciana** y del 1,9% en **País Vasco**. Por su parte, en **Cantabria** los precios de consumo crecían en diciembre un 1,3%.

Por último, en el resto de Comunidades, también en todas ellas se registró en agosto del 2009 una inflación negativa, cuando en todas en el mes de diciembre del año anterior la inflación era positiva, oscilando entre el 1,6% registrado en **Aragón, Asturias, Canarias y La Rioja** y la inflación mínima correspondiente a **Castilla la Mancha** con un 0,9%.

En lo que respecta a la evolución salarial, el incremento salarial pactado en los diferentes convenios realizados en los ocho primeros meses del año 2009 en **Aragón (3,1%), Asturias (3,5%), Cantabria (3%), Castilla y León (3%), Castilla la Mancha (3,4%), Cataluña (2,8%), Comunidad Valenciana (2,9%), Extremadura (3,2%), Galicia (3,5%), Madrid (2,9%), Murcia (2,8%) y La Rioja (3,4%)** fue superior al correspondiente incremento medio nacional (2,7%), en **Andalucía y Navarra** el incremento fue similar al nacional y en el resto de Comunidades los incrementos salariales se pactaron por encima de dicha media, siendo el menor incremento el registrado en **Canarias** (un 2,2%).

En las Comunidades con un incremento salarial superior al nacional, con excepción de Asturias donde en diciembre el incremento salarial fue una décima inferior y Cantabria donde permanece estabilizado, se ha producido una desaceleración de los incrementos salariales con relación al año anterior, si en éstos no se incluyen los registrados después de diciembre y la cláusula de salvaguarda. Dichos descensos se mueven entre los 1,4 puntos porcentuales de **Madrid**, 1,1% de **Cataluña** y nueve décimas de **Murcia**, hasta las dos décimas de **Castilla la Mancha**, tres décimas de **Extremadura**, las cuatro de **Comunidad Valenciana y La Rioja**, las seis décimas de **Aragón** y las siete décimas de **Galicia**. No obstante, si se incluyen los convenios registrados después de diciembre y las cláusulas de

salvaguada en **Aragón, Castilla y León, Castilla la Mancha, Cataluña, Comunidad Valenciana, Extremadura, Galicia, Madrid, Murcia y La Rioja** se registra una desaceleración, mientras que en **Asturias y Cantabria** el crecimiento salarial sería superior en agosto del 2009, de lo que lo había sido en el año 2008.

Por lo que respecta a la dos Comunidades en la que el incremento salarial coincidió con el medio nacional, en ambas el incremento en agosto es inferior en ocho y un punto porcentual, respectivamente, al registrado en el año anterior si no se incluyen los convenios después de diciembre y la cláusula de salvaguarda. Si no es así, también en ambos casos se registra una desaceleración. Por lo que respecta al resto de Comunidades en las que el crecimiento de los salarios se situó por debajo de la media nacional, en **Baleares** (2,5%) el descenso fue de 2,9 puntos porcentuales, en **Canarias** (2,2%) fue de 2 puntos porcentuales, mientras que en **País Vasco** (2,5%) el incremento salarial en agosto fue inferior en 2,5 puntos porcentuales respecto al de finales de diciembre. Este proceso de desaceleración se da también, aunque en una menor proporción, si se introducen los convenios después de diciembre y la cláusula de salvaguarda.

Madrid, 30 de Septiembre de 2009

NOTAS

NOTAS

Indicadores de Industria.

1. Índice de Producción Industrial:

A partir del año 2009, el INE facilita esta información según la nueva CNAE-09. En el caso de CC.AA., las series se facilitan enlazadas a partir del año 2002. Por ello, en este boletín los gráficos comienzan en el año 2002. No obstante, dado que, aunque no de forma oficial, se disponía de datos facilitados por el INE desde el año 1991, cuando a través de una elaboración propia, se reconstruya la serie desde ese año, los gráficos se volverán a facilitar con la longitud de boletines anteriores.

2. Consumo de Energía Eléctrica:

Andalucía.

Los datos a partir de octubre de 2008 reflejan la nueva Clasificación Nacional de Actividades Económicas CNAE-09, establecida en el Real Decreto 475/2007, de 13 de abril. Dado que la fuente no ha facilitado los datos homogéneos, correspondientes a la nueva CNAE-09, los datos a partir de octubre de 2008 no son comparables con los anteriores.

3. Opiniones Empresariales Industria:

En todas las CC.AA., excepto en Canarias y Extremadura, el valor "0", en varias fechas diferentes, se ha sustituido por el promedio del año correspondiente a cada uno de ellos.

Indicadores de Construcción.

4. Viviendas:

Los datos de viviendas, protegidas tanto iniciadas como terminadas, desde Enero-2004 a Diciembre 2005 son elaboración propia basada en información facilitada por la fuente.

5. Licitación Oficial de Fomento:

Extremadura.

Al no existir dato en Julio de 2004, dicho valor se ha calculado como promedio del mismo mes de cada año, desde el origen de la serie hasta Julio de 2003.

6. Consumo de Energía Eléctrica:

Andalucía.

Los datos a partir de octubre de 2008 reflejan la nueva Clasificación Nacional de Actividades Económicas CNAE-09, establecida en el Real Decreto 475/2007, de 13 de abril. Dado que la fuente no ha facilitado los datos homogéneos, correspondientes a la nueva CNAE-09, los datos a partir de octubre de 2008 no son comparables con los anteriores.

Indicadores de Servicios.

7. Encuesta de Ocupación en Alojamientos Turísticos: Acampamentos y Apartamentos Turísticos:

En algunas comunidades, el INE ha considerado que el tamaño de la muestra no permite facilitar los resultados desagregados con objeto de preservar el secreto estadístico. No obstante, en el total nacional se incluyen los datos correspondientes.

Consumo de Energía Eléctrica Servicios:

8. La Rioja.

El consumo de energía eléctrica del Sector Servicios de La Rioja experimenta una subida importante a partir de junio de 1995, como consecuencia de que IBERDROLA estableció un rediseño en el epígrafe “Conceptos no especificados”, pasando parte de esta rúbrica al Sector Servicios.

9. Andalucía.

Los datos a partir de octubre de 2008 reflejan la nueva Clasificación Nacional de Actividades Económicas CNAE-09, establecida en el Real Decreto 475/2007, de 13 de abril. Dado que la fuente no ha facilitado los datos homogéneos correspondientes a la nueva CNAE-09, los datos a partir de octubre de 2008 no son comparables con los anteriores.

10. Galicia.

El dato del mes de junio de 2009, correspondiente a “Consumo de Energía Eléctrica de usos domésticos” se ha estimado en función del consumo del mismo mes de años anteriores. En el momento que la fuente proporcione el dato original será sustituido.

Indicadores de Demanda.

11. Consumo de Energía Eléctrica:

Andalucía.

Los datos a partir de octubre de 2008 reflejan la nueva Clasificación Nacional de Actividades Económicas CNAE-09, establecida en el Real Decreto 475/2007, de 13 de abril. Dado que la fuente no ha facilitado los datos homogéneos, correspondientes a la nueva CNAE-09, los datos a partir de octubre de 2008 no son comparables con los anteriores.

Indicadores del Mercado de Trabajo.

12. Población activa, población ocupada, población asalariada, parados, tasa de actividad y tasa de paro:

Las series 2005 y siguientes corresponden a la nueva metodología de la EPA-2005. Los datos de “parados”, “activos”, “tasa de actividad” y “tasa de paro” se ajustan a la nueva normativa exigida por la Oficina Estadística de la Unión Europea (Eurostat), en el Reglamento 2257/2003, así como lo hacen, también, en la nueva base de población utilizada (base poblacional Censo 2001) y la modificación en el cálculo de los factores de elevación.

Las series 1996-2004 corresponden a la revisión hecha por el I.N.E., basándose en la Metodología 2005.

Las series anteriores a 1996 corresponden a la antigua Metodología.

A partir del año 2008 el INE facilita la información sectorial según la nueva CNAE-09. Además, para que el usuario pueda llevar a cabo el enlace correspondiente con las series anteriores, el I.N.E. ha proporcionado también la matriz de paso entre esta CNAE y la CNAE-93. Por ello, los datos sectoriales anteriores al 2008 son de elaboración propia a partir de la información facilitada por el INE.

13. Paro Registrado:

Los datos a partir de marzo de 2009 reflejan la nueva Clasificación Nacional de Actividades Económicas CNAE-09, establecida en el Real Decreto 475/2007, de 13 de

abril. Dado que la fuente no ha facilitado los datos homogéneos correspondientes a la nueva CNAE-09, los datos a partir de 01-03-2009 no son comparables con los anteriores.

14. Afiliados a la Seguridad Social en alta laboral:

Mientras la fuente no facilite los datos homogéneos a nivel regional y/o no se pueda llevar a cabo en esta Unidad su homogeneización, debido al cambio de la CNAE, los datos sectoriales, desde enero de 2009, son de elaboración propia a partir de la información facilitada por la fuente y no son exactamente comparables con los anteriores.

15. Encuesta de Coyuntura Laboral:

Los datos a partir de enero de 2009 reflejan la nueva Clasificación Nacional de Actividades Económicas CNAE-09, establecida en el Real Decreto 475/2007, de 13 de abril. Dado que la fuente no ha facilitado los datos homogéneos correspondientes a la nueva CNAE-09, los datos a partir de 01-01-2009 no son comparables con los anteriores.

Indicadores de Precios I, II y III.

16. Índices de precios de consumo y diferenciales de inflación:

Las series corresponden a la nueva base 2006, que el INE ha elaborado para el período temporal que comienza en el año 2002. Los datos anteriores son elaboración propia, utilizando los coeficientes de enlace calculados a partir de la información de la base 2001 y la base 2006. Las notas metodológicas elaboradas por el INE se encuentran en su página Web (www.ine.es).

17. La serie correspondiente al IPC Armonizado de la U.E. contiene datos de 15 Estados miembros hasta el 30.04.2004, de 25 Estados miembros desde el 01.05.2004 y de 27 Estados miembros desde el 01.01.2007.

Indicadores de Salarios y Monetarios.

18. Coste salarial:

En este boletín, los datos procedentes de la Encuesta Trimestral de Coste Laboral (ETCL) elaborada por el INE, se facilitan sólo a partir del año 2000, al haber modificado la fuente la base, pasándolos a base 2008 y haber realizado el cambio a la CNAE-09. Cuando el INE facilite los datos anteriores o éstos estén disponibles, después de llevar a cabo una elaboración propia, los gráficos se volverán a facilitar con la longitud de boletines anteriores.

19. Incremento Salarial pactado en convenio:

Los datos trimestrales se refieren al dato del último mes del correspondiente trimestre. Los datos anuales incluyen los convenios registrados después de diciembre de cada año y la cláusula de salvaguarda. Por ese motivo, los datos acumulados al mes de diciembre no coinciden con los anuales.
