CONSTRUCTION OF A NEW INSTITUTE OF SECONDARY  
EDUCATION IN SANTA MARIA (MALLORCA)  
Balearic Institute of Educational Infrastructure  
and Services (IBISEC)

**Programa Operativo  
de Illes Balears**

Año 2018

**Fondo Europeo de Desarrollo Regional**

## **CONSTRUCTION OF A NEW INSTITUTE OF SECONDARY EDUCATION IN SANTA MARIA (MALLORCA)**

### **Basic project description**

The Balearic Institute of Educational Infrastructure and Services (IBISEC) is the public company attached to the Conselleria of Education and Universities which aims to create, build, adapt and expand public educational centers in the territorial area of the Balearic Islands

The co-financed action consists of the construction in a new Secondary Education Institute (IES) in the municipality of Santa María del Camí in Mallorca

The proximity of Santa María to the capital has caused that in recent years the municipality has experienced a continuous population growth, with a substantial increase in the demand for places of schooling. This has caused that recently the IES Santa María has been forced to have a temporary location with modular classrooms.

The project consists in the construction of 16 units for Compulsory Secondary Education (ESO), formed in a two-story building, consisting of two transversal modules and a longitudinal one. In the three transversal modules the teaching program of secondary classrooms, workshops, laboratories, classroom UEECO (Specific Educational Unit in Ordinary Center), as well as library and gymnasium is distributed. Its execution allows the elimination of 5 modular classrooms, as well as picking up students from the neighboring municipalities

The cost of the action is **€ 4,827,914**, co-financed by 50% (€ 2,413,957) by the ERDF. The capacity of this subsidized education infrastructure is 576 students and its entry into operation will benefit the 480 students who may enroll in it initially.

Below are the arguments that make this project be considered as Good Practice in accordance with the criteria defined for this purpose

### **Criterion 1. High diffusion among the beneficiaries and the general public.**

The project has a high dissemination of the contribution of European Funds to economic and social development both among potential beneficiaries and the general public and has been widely disseminated through the different information and advertising measures developed.

Among the **compulsory measures** carried out and which have been implemented in accordance with Community regulations, the following must be pointed out:

During the bidding and award process, the contribution of the European Union in the co-financing of the action through the publication of the information on the website of the Balearic Government was highlighted. Likewise, reference has been made to the ERDF in the announcement of the tender for the works published in the Official Bulletin of the Balearic Islands (BOIB), and in the documentation related to the contracting file and the administrative documentation, as well as the corresponding logos

#### El Consell de Govern ha aprovat la licitació de les obres de construcció de l'IES Santa Maria

Darrera actualització: 31/03/2017

El Consell de Govern ha aprovat autoritzar l'Institut Balear d'Infraestructures i Serveis Educatius (IBISEC) a fer la despesa corresponent a la licitació de les obres de construcció del nou IES Santa Maria del Camí per un import de 6.262.498 euros. El Pla d'Infraestructures Educatives 2016-2023 aprovat per la Conselleria d'Educació i Universitat preveu en la planificació d'infraestructures per a l'any 2017 la construcció d'un nou Institut d'Educació Secundària a Santa Maria.

El nou centre forma part dels projectes inclosos en el Programa Operatiu FEDER/FSE 2014-2020 de les Illes Balears, que seran cofinanciat pel Fons Europeu de Desenvolupament Regional (FEDER). El projecte té un termini d'execució de 14 mesos, una vegada licitat.

El centre donarà resposta a les necessitats d'escolarització de la zona, que estan marcades pel creixement poblacional del municipi i per la situació de provisionalitat de l'actual centre. Es tracta d'un institut que han reclamat llargament els habitants de Santa Maria.

Actuacions cofinancades

El Institut Balear d'Infraestructures i Serveis Educatius (IBISEC), està treballant actualment en les següents línies d'actuació incloses al Programa Operatiu FEDER de Balears 2014-2020:

1. Construcció d'un nou Institut d'Educació Secundària a Santa Maria.

L'actuació consisteix en la construcció d'un Institut d'Educació Secundària que acollirà 400 alumnes de Santa Maria i Santa Eugènia i comptarà amb 16 unitats d'IES i una aula IBISEC (Unitat Educativa Específica en Centre Ordinari).

El pressupost destinat a l'actuació és de 6.262.498,58 euros, i una vegada licitat, tindrà un període d'execució de 14 mesos.

Aquesta acció es desenvoluparà amb el cofinancament del 50% del Fons Europeu de Desenvolupament Regional (FEDER), tal i com es contempla al Programa Operatiu del FEDER de les Illes Balears per al període 2014-2020.

S'incloïu dins de l'eix prioritari 10: Inversió en educació, formació i formació professional per l'adquisició de capacitats i un aprenentatge permanent, i concretament a l'objecte específic 5.1: Millorar les infraestructures d'educació i formació, que preveu elevar la capacitat de les infraestructures d'educació de la regió, fet que tindrà una repercussió directa sobre l'atenció de l'alumnat i els seus resultats acadèmics.

Link a la plataforma de contractació

During the execution of the work a temporary informative poster has been placed on the project to comply with the regulations on information and communication measures. Once the investment has been completed, a permanent plate has been placed once the project has finished and it is located at the entrance of the building

In addition, **other actions and measures** in communication and information have been carried out, to reinforce and give greater visibility to the co-financing by the European Union to the action, among which the following stand out:

In various media of the Balearic Islands, both in its paper editions and in its online versions, information has been collected on the tender and award of the contract, as well as the start of the works and the opening ceremony of the IES. Information notes have also been prepared on this same issue that have been published, always mentioning the co-financing of the ERDF.

### Publicada la licitación del nuevo IES de Santa Maria por 6,2 millones de euros

Proyecto IES (GOVERN)

- El Boletín Oficial de las Islas Baleares (BOIB) ha publicado este jueves la licitación del nuevo IES de Santa Maria, cuya construcción supondrá una inversión de 6.262.698 euros.

EUROPA PRESS: 27/04/2017

Este nuevo centro forma parte de los proyectos incluidos al Programa Operativo FEDER/FSE 2014-2020 y está integrado en el Plan de Infraestructuras Educativas 2016-2023 aprobado por la Conselleria de Educación y Universidad.

Según han indicado desde la Conselleria, el nuevo centro estará cofinanciado por el Fondo Europeo de Desarrollo Regional (Feder) y tiene un plazo de ejecución de 14 meses, una vez licitado.

### Adjudicada la contratación de la construcción del IES Sa

Última actualización: 31/07/2017

Hoy se ha adjudicado la contratación de la construcción del nuevo IES de Santa M del Cami por un importe de 4.827.914 euros y un plazo de ejecución de 14 meses prevé que las obras empiecen a principios del mes de septiembre.

El nuevo centro forma parte de los proyectos incluidos al Programa Operativo FEDER/FSE 2014-2020 de las Islas Baleares, que serán cofinanciados por el Fondo Europeo de Desarrollo Regional (FEDER). El proyecto tiene un plazo de ejecución meses, una vez licitado.

13 febrer 2019 | PRESIDENTA

Alumnat, professorat, famílies i autoritats han celebrat la inauguració oficial del nou IES Santa Maria, amb una capacitat per a 480 alumnes

NOTA INFORMATIVA

### El nou IES Santa Maria

L'institut, amb quatre línies (16 unitats d'ESO) i 1 aula UEEO (Unitat Educativa Específica en Centre Ordinari), té una capacitat per a 480 alumnes i 40 professors. Ha suposat una inversió de més de 4,8 milions d'euros i forma part dels projectes del Programa Operatiu FEDER/FSE 2014-2020 de les Illes Balears, que seran cofinançats pel Fons Europeu de Desenvolupament Regional (FEDER).

Vicepresidència IB  
@VicepresidenciB

La vicepresidenta del @goib, @busquets\_bel, comparteix l'alegria de la comunitat de l'institut de Santa Maria, una infraestructura possible gràcies, en part, al finançament de Fons Europeus

On February 13, 2019 took place the official opening ceremony of the IES Santa Maria, an event attended by students and their families, teachers, public authorities and the media. In the parliaments mention was made of the contribution of the European Union in the construction of infrastructure.

*Images of the opening ceremony*

Nou Institut d'Educació Secundària  
a Santa Maria del Camí

Projecte cofinançat a càrrec del  
Programa Operatiu 2014-2020 FEDER de les Illes Balears

*In this act, an illustrative presentation was prepared on the constructive process, as well as on the main innovations that it incorporates and that has spread among the entire Balearic educational community.*

In addition, at the entrance of the educational center, a television screen has been installed where a video is permanently projected, which has been made with images of the construction process and the characteristics of the project, also mentioning the participation of the ERDF in the construction of the infrastructure. The video incorporates the corresponding logos and emblems.

In order to inform the population about the action, emphasizing its co-financing by the European Union, two portable roll-ups have been published. The first one identifies the co-financed action and has been placed at the entrance of the site.

The other roll-up, identifies this action as Good Practice of Co-financed Action.

This action has also been disseminated through the mapping system of co-financed projects of the DG European Funds, located on its website ([http://www.caib.es/sites/fonseuropeus/ca/portada\\_2016/?campa=yes](http://www.caib.es/sites/fonseuropeus/ca/portada_2016/?campa=yes)). This online application, which is accessible to anyone, allows visualizing not only the geographical location of the investment, but also systematized data on the name, scope of intervention, co-financing fund, EU aid, total eligible cost and even images of the investment made.

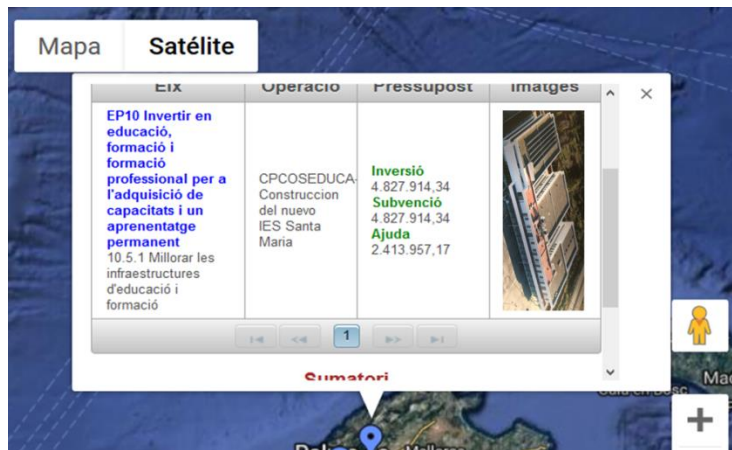

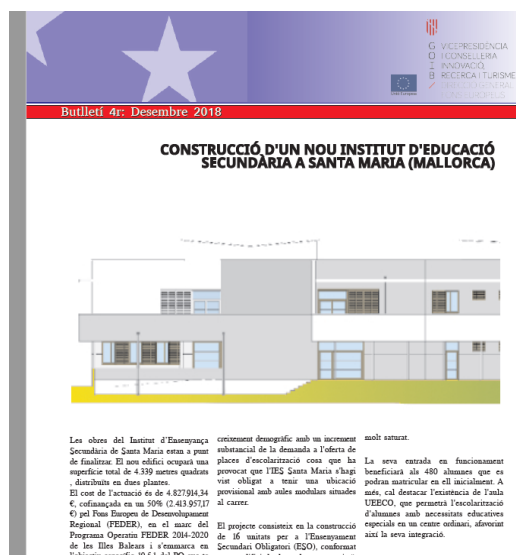

Image of the location system for co-financed projects of the Balearic Islands

Roll-ups used in the opening ceremony

The fourth issue of the **Bulletin of European Funds in the Balearic Islands** has also included information on the project and the ERDF contribution in its execution, paying special attention to the results achieved thanks to this investment

Finally, it should be noted that the IBISEC has also designed jackets that are used by the personnel who participate in the construction and in the site visits of the infrastructures that include the FEDER logo on the sleeve.

## Criterio 2. Incorporación de elementos innovadores.

The previous IES of Santa María was located in an old building and did not meet many of the requirements necessary to teach classes properly. The limited capacity of the same had

motivated the location of part of the students in provisional prefabricated classrooms, prior to the construction of the new building.

The new IES has radically improved the conditions of schooling of students and the teaching possibilities of teachers in their educational activity.

In this way, the center has been equipped with the necessary infrastructures for the use of the new Information and Communication Technologies (ICTs) and special facilities as innovative elements

### **Criterion 3. Adaptation of the results obtained to the established objectives.**

The improvement of this educational infrastructure has had a direct impact on the attention to students and their academic results and will have a positive effect on the numbers of school dropouts and the educational offer that will allow improving the training of students and, consequently, a greater perspective of employability in the imminent future, as well as promoting the integration of students with disabilities or with difficulties of social integration

### **Criterio 4. Contribución a la resolución de un problema o debilidad regional.**

The early school dropout rate in the Balearic Islands presents one of the highest rates in Spain and the European Union, falling far short of the target set in the Europe 2020 Strategy of 10%. The improvement of educational quality, which obviously involves a greater investment in educational infrastructure, as in the case of the construction of the IES Santa María, will increase the possibilities of solving the most significant deficiencies that affect the causes of school dropout

In addition, the Balearic Islands have a historical deficit in terms of educational infrastructure that needs to respond to the needs of schooling and a high volume of pending reform actions.

It is necessary to consider the fact that schooling data in Balearic Island have not decreased even during the years of economic crisis, showing a behavior different from that of most of the other Autonomous Communities.

To this must be added the continued growth of the school population throughout the archipelago, which has only exacerbated the pressure on educational infrastructure, especially in the islands of Mallorca, Eivissa i Formentera.

### **Criterion 5. High degree of coverage of the target population.**

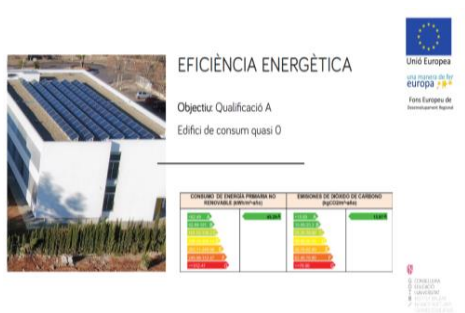

The municipality of Santa María is well connected to any point on the island and only 14 kilometers from Palma. Its continuous population growth has been reflected in an increase in the demand for places of schooling in the municipality, which is why, for several courses, the IES Santa María has had a provisional location with modular classrooms located on the street.

La construcción del nuevo colegio no sólo beneficia de forma directa a los alumnos que pueden hacer uso del nuevo instituto, y a los que en el futuro puedan ser escolarizados en el mismo, sino también a su profesorado, personal de administración y servicios y demás miembros de la comunidad educativa de Santa María.

The entry into operation of the center has allowed the incorporation of 480 students who have been able to enroll in it initially, as well as collect, by direct affiliation, the students of the neighboring municipality of Santa Eugenia, and eliminate the double affiliation in the IES Sineu.

## Criterion 6. Consideration of the horizontal criteria of equal opportunities and environmental sustainability

In the construction of this new center, measures for saving and energy efficiency have been incorporated, in particular: improvements in the insulation that suppose a great saving in the demand of energy, flat covered and accessible floor to facilitate the maintenance of the facilities and the implementation of renewable energy systems, installation of more efficient air conditioning systems, improvements in the ventilation system, installing control and compartmentalization systems

Public education in Spain is mixed. So equal opportunities in their access according to gender is guaranteed. The principle of inclusion is reflected, among other aspects, in the existence of a

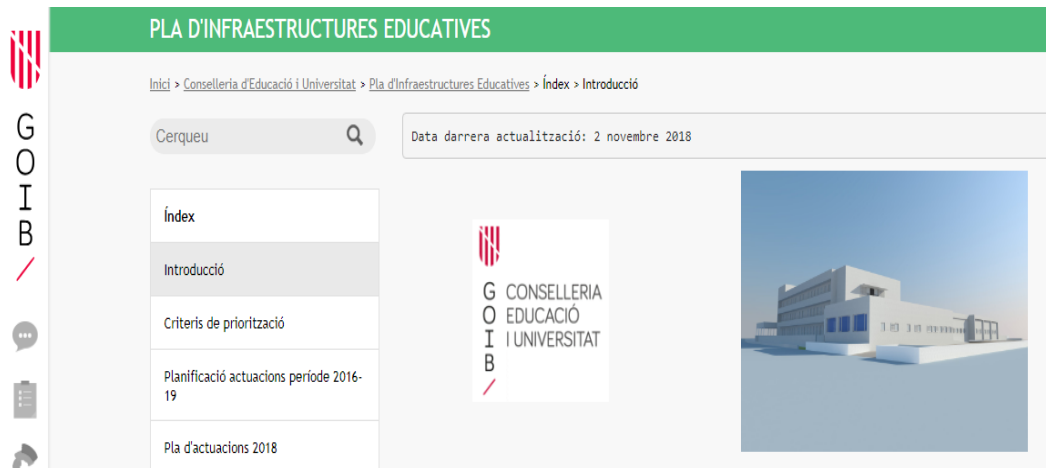

UEECO classroom (Specific Educational Unit in the Ordinary Center) to assist students who have special educational needs.

### **Criterion 7. Synergies with other policies or instruments of public intervention**

This action is included in the Regional Plan for Educational Infrastructures 2016-2023 which determines the educational infrastructure needs for each municipality of the Balearic Islands, the pending requests for intervention, as well as the establishment of the main shortcomings and needs for action.

This Plan specifies the criteria for planning the actions to be carried out in the period.
