Acquisition of vehicles equipped for the prevention and defense against forest fires

The Dirección General de Ordenación Forestal (Directorate- General of Forest Management) carried out this acquisition of 12 motor-driven vehicles to fight forest fires operation, with the aim of renewing the vehicles available to the Autonomous Community.

The prevention and defense device against forest fires demands, to guarantee the success of the operations, modern motor-driven vehicles, more efficient, respectful with the environment and equipped with technical improvements that increase the staff safety.

Most of the vehicles equipped for the fight against forest fires that were available to the Xunta de Galicia were not in good condition. The two main causes of this bad state are the high number of years of use and the deterioration that they suffer in the harsh conditions of the works of prevention and defense against forest fires performance. It should be noted, for example, that most of these vehicles exceeded 10 years old, age in which their effectiveness is greatly reduced.

This operation reached a total cost of 2.538.720 €, of which 80% is FEDER aid (2.030.976 €) and 20% is provided by the Xunta de Galicia.

With the acquisition of these motor-pump vehicles, 25% of the motor-driven vehicles that exceeded 10 years old have been renewed. This is intended to keep below 2% the fires that exceed 25 hectares and no more than one hectare is affected by at least 70% of the fires.

It is considered a Best Practice because it meets the criteria designed for that purpose:

1. It has been conveniently disseminated among the beneficiaries, potential beneficiaries and the public in general

The distribution of the vehicles was made on June 9, 2017 in the City of Culture of Santiago de Compostela in a public ceremony. This was reflected in the website of the Consellería del Medio Rural.

All vehicles carry advertising with the appropriate structure to the regulations that govern the information of the FEDER community funds that co-financed the operation. A sticker was placed on each and every one of them, in a conspicuous place, where reference is made to the funds that support the operation with the following format:

Adquisición de vehículos equipados para a prevención e defensa contra os incendios forestais

MEDIO RURAL REFORZA A LOITA CONTRA OS INCENDIOS COA ENTREGA DE 12 NOVAS MOTOBOMBAS AOS DISTRITOS FORESTAIS DE GALICIA

- A conselleira presidiu esta mañá o acto de entrega destes vehículos, que foron adquiridos por importe de 2,5 millóns de euros
- Desde o ano 2009, incorporáronse preto dun centenar deste tipo de todoterreiros, imprescindibles para a loita contra os lumes

Santiago de Compostela, 9 de xuño de 2017.- A conselleira do Medio Rural, Ángeles Vázquez, participou esta mañá na entrega de 12 novas motobombas para os distritos forestais de Galicia, a razón de 3 por provincia. Desta forma, a Xunta renova os vehículos motobomba para mellorar a eficacia do dispositivo de loita contra os lumes forestais no seu conxunto e antes de que comece a tempada de alto risco de incendios.

A empresa ganadora do concurso para a adquisición deste lote de motobombas foi Uro Vehículos Especiales S.A. por un importe de 2,5 millóns de euros. O 80% deste orzamento está cofinanciado polo Fondo Europeo de Desenvolvemento Rexional no marco do Programa Operativo FEDER Galicia 2014-2020. Estes vehículos están equipados cunha cisterna de 4.200 litros e cabina sinxela (con capacidade para 2 persoas) para os distritos forestais. A relación de motobombas é a seguinte:

Provincia	Distrito	Localización motobomba
A Coruña	Distrito I	Concello de Ortigueira
	Distrito II	Concello de Coristanco
	Distrito IV	Concello de Bello
	Distrito VI	Concello de Viveiro
Lugo	Distrito IX	Concello de Sarria
	Distrito X	Concello de Castro de Rei
Ourense	Distrito XIII	Concello do Barco de Valdeorras
	Distrito XIV (2 motobombas)	Concello de Verín
Pontevedra	Distrito XIX (3 motobombas)	Concello da Gustiña
		Concello de Cerdeado-Cotobade
		Concello de Moraña

Ángeles Vázquez destacou o compromiso do seu departamento na loita contra os lumes forestais e avanzou que en breve entregaranse novas motobombas aos concellos e aos demais distritos forestais. O obxectivo, engadiu, é dotar a todas as administracións que colaboran na prevención e loita contra os incendios forestais do material axeitado para un bo funcionamento de todo o operativo.

Para a campaña de alto risco de incendios forestais, que comeza o vindeiro 1 de xullo, o Goberno galego contará con preto de 7.000 persoas que participan no dispositivo antincendios, entre efectivos da Xunta, persoal do Ministerio, do Exército e dos Campos e Forzas de Seguridade do Estado. Galicia disporá de arredor dunha trintena de medios aéreos -entre os propios da Xunta e os que aporta o Estado- e 360 motobombas da Xunta, dos concellos e dos parques de bombeiros, aos que se engaden cisternas, pás e outros vehículos.

XUNTA DE GALICIA **Galicia**
INFORMACIÓN AOS MEDIOS

A titular de Medio Rural sinalou que a nosa Comunidade destaca polo seu dispositivo de loita contra incendios, pero incoñiu en que é preciso concienciar á cidadanía para intentar diminuír desde o primeiro momento o risco dun lume, xa que o monte é patrimonio de todos. Por iso a Consellería aposta pola prevención, vixilancia e disuasión e lembra que as administracións locais tamén teñen a competencia de manter limpas as faixas de xestión.

Parque móbil
Estas 12 motobombas sómanse as 43 xa entregadas ao longo do ano 2016 aos distintos distritos forestais, por un valor superior aos 9 millóns de euros. Así mesmo, o ano pasado tamén se cederon outros 14 vehículos a concellos e se facemos balanceo desde o ano 2009, cómpre destacar que se renovaron un total de 55 motobombas para os distritos forestais e 42 para os concellos de Galicia, por tanto, 97 en total.

La Consellería de Medio Rural potencia el distrito forestal número II con una motobomba

REDACCIÓN CARBALLO

La conselleira de Medio Rural, Ángeles Vázquez, participou ayer por la mañana en la entrega de doce nuevas motobombas para los distritos forestales de Galicia, a razón de tres por provincia. Entre los distritos beneficiados figura el número II, que engloba a la gran mayoría de los municipios de la comarca de Bergantinos. La motobomba quedará emplazada en el municipio de Coristanco.

La empresa ganadora del concurso para la adquisición de este lote de motobombas fue Uro Vehículos Especiales, S.A., por un importe de 2,5 millones de euros. El 80 por ciento de este presupuesto está finan-

ciado por el Fondo Europeo de Desenvolvemento Rexional en el Programa Operativo Feder Galicia 2014-2020.

Los nuevos vehículos de lucha contra los incendios están equipados con una cisterna de 4.200 litros y cabina con capacidad para dos personas.

Ángeles Vázquez destacó el compromiso de su departamento en la lucha contra los incendios y avanzó que, en breve, se entregarán nuevas motobombas a los concellos y al resto de distritos forestales. El objetivo, añadió, es dotar a todas las administraciones que colaboran en la prevención y lucha contra los incendios forestales de medios y material adecuado para el buen funcionamiento de los operativos.

Medio Rural entrega motobombas para reforzar la lucha contra los incendios

Por Redacción
Viernes 9 de Junio, 2017

La conselleira de Medio Rural, Ángeles Vázquez, participou este viernes en la entrega de 12 nuevas motobombas para los distritos forestales de Galicia, tres en la provincia de Pontevedra que estarán localizadas en los concellos de Cerdeado-Cotobade, Moraña y Pontevedra.

De esta forma, la Xunta renueva los vehículos motobomba para mejorar la eficacia del dispositivo de lucha contra los fuegos forestales en su conjunto y antes de que comience la temporada de alto riesgo de incendios.

La empresa ganadora del concurso para la adquisición de este lote de motobombas fue Uro Vehículos Especiales S.A. por un importe de 2,5 millones de euros. El 80% de este presupuesto está cofinanciado por el Fondo Europeo de Desarrollo Regional en el marco del Programa Operativo FEDER Galicia 2014-2020. Estos vehículos están equipados con una cisterna de 4.200 litros y cabina sencilla (con capacidad para 2 personas).

Ángeles Vázquez avanzó que en breve se entregarán nuevas motobombas a los concellos y a los demás distritos forestales.

Para la campaña de alto riesgo de incendios forestales, que comienza el próximo 1 de julio, el gobierno gallego contará con cerca de 7.000 personas que participan en el dispositivo antincendios, entre efectivos de la Xunta, personal del Ministerio, del ejército y de los cuerpos y fuerzas de seguridad del Estado. Galicia dispondrá de alrededor de una trintena de medios aéreos -entre los propios de la Xunta y los que aporta el Estado- y 360 motobombas de la Xunta, de los concellos y de los parques de bomberos, a los que se añaden cisternas, pásas y otros vehículos.

2. The operation incorporates innovative elements

Through this operation, a part of the fleet of vehicles against forest fires has been renewed and modernized, so necessary to attend the forest fires that may occur in Galicia and especially in those moments in which, due to the simultaneity of fires registered, it is necessary to optimize the resources that act in each fire. With these vehicles, and in comparison with those that have been replaced, the reaction times are reduced considerably and the equipment they are equipped with contributes to guarantee greater staff safety as well as greater efficiency and effectiveness in the operation.

3. Adaptation of the results obtained to the established objectives

This operation contributes significantly to improving the efficiency and effectiveness of the prevention and defense mechanism against the forest fires of the Xunta de Galicia, equipping it with modern, more efficient motor-driven vehicles, respectful of the environment and with technical and technological improvements that increase the staff security.

4. Contribution to the resolution of a problem or weakness detected in the territorial scope of execution

Forest fires are a threat that affects not only the public and private forestry heritage, but also natural resources and the maintenance and development of human activity in rural areas.

This acquisition of 12 new vehicles contributes notably to the success in the fight against forest fires, as well as to improve the staff safety during the work of extinction.

5. High degree of coverage on the population to which it is addressed

The incorporation of 12 new vehicles to the operation of prevention and defense against forest fires in Galicia, was a considerable improvement to the protection of the population of the territorial areas of influence of these and even other areas, due to its greater ease of movement , being able to act in any point of the Autonomous Community of Galicia.

6. Consideration of the horizontal criteria of equal opportunities and non-discrimination, as well as social responsibility and environmental sustainability

For the supply contracting of the 12 vehicles equipped for the prevention and defense against forest fires, these criteria have been considered, which are elements to take into account in case of possible dead heat in the process of final evaluation of the offers. Specifically, preference is given, in the first place, to the companies that have a permanent number of workers with disabilities greater than 2% and, secondly, to the companies that have implemented an Equality Plan.

Likewise, equality of opportunity is very well considered in any of the texts in which reference is made to it, because in all of them a neutral language is used, taking special care not to make use of a language that can be considered sexist.

Finally, as already indicated, these vehicles are more efficient and respectful with the environment than those that come to replace, some of them with more than 30 years.

7. Synergies with other statecraft or instruments of public intervention

This operation is related to the provisions of the Prevention and Defense Plan against Forest Fires of Galicia (PLADIGA).

This plan contributes to the defense of forest lands and areas of forest influence, encompassing prevention, protection, awareness, surveillance, detection and extinction plans, as well as research and development, cartographic support, coordination and the training of service agents.
